EDUCATION

Dr. D. Y. Patil Institute of Technology (DIT), Pune CGPA: 8.04
BE in Artificial Intelligence & Data Science (AI & DS) **Aug 2023 – Jun 2027**

SUMMARY

A Machine Learning and AI Engineering student skilled in Python, ML algorithms, data preprocessing, and full-stack integration. Experienced in building ML-powered dashboards, recommendation systems, and real-time analytics platforms using Scikit-learn, Flask, and Streamlit. Proficient with SQL/NoSQL databases and data visualization tools. Demonstrates strong capability in applied AI and research-driven problem-solving for ML engineering challenges.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL
Web Technologies: React.js, Tailwind CSS, HTML
Mathematics for ML: Linear Algebra, Probability, Statistics
ML Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, PyTorch
Backend: Flask, Streamlit
Databases: MySQL, MongoDB, SQLite
DevOps & Tools: Git, GitHub, AWS, Docker, Excel
Concepts: Object-Oriented Programming, DSA
Machine Learning: supervised & unsupervised learning, Data Preprocessing & visualization, Feature Engineering, EDA, Model Evaluation, Model Deployment, Cross-Validation, Hyperparameter Tuning, Deep Learning basics
Soft Skills: Problem-Solving, Collaborative Teamwork, Technical Communication, Project Coordination, Research & Analysis

PROJECTS

Employee Performance Evaluation Dashboard | HTML, CSS, JavaScript, Flask, MySQL, Scikit-learn
- Developed an AI-powered employee evaluation system with automated scoring and rule-based analytical insights.
- Engineered interactive radar chart visualizations to track key metrics: efficiency, attendance, teamwork, and project quality.
- Implemented Scikit-learn Linear Regression model to predict future performance trends and scores.
- Built comprehensive modules for employee management, metric assessment, and automated reporting.

MedRisk-Heart | Python, Scikit-learn, Streamlit, Pandas | https://medrisk-heart.streamlit.app
- Built a supervised ML system for heart disease risk prediction using clinical data
- Performed robust data cleaning and feature engineering on real-world medical datasets
- Evaluated models using ROC-AUC and confusion matrix with threshold tuning for medical safety
- Deployed a single-page Streamlit dashboard with interpretable risk visualization.-

Global AI Economic Intelligence Platform | Python, Streamlit, Pandas, Scikit-learn, APIs | https://ai-economics-intelligence.streamlit.app
- Engineered a real-time economic analytics platform covering 193 countries with automated API data pipelines.
- Developed machine learning models for GDP prediction, inflation forecasting, and economic performance scoring.
- Implemented a secure Streamlit dashboard with user authentication, admin controls, and advanced search functionality.
- Created comprehensive visualizations including heatmaps, comparative analysis charts, and economic trend graphs.

CERTIFICATIONS (verified)

- **Machine Learning Specialization – DeepLearning.AI**
- **AWS Educate Machine Learning Foundations – AWS**
- **AI For Everyone – DeepLearning.AI**
- **Engaging Stakeholders for Success – Cisco**
- **Data Science Essentials With Python – Cisco**
